University Mechanical Contractors, Inc. Achieves National Designation for Energy-Saving Excellence

ROCKVILLE, MD – The Mechanical Service Contractors of America (MSCA) announced that University Mechanical Contractors, Inc. (UMC) has been awarded the MSCA GreenSTAR designation, which recognizes qualified contractors who have met stringent guidelines for offering energy-saving solutions to their customers. MSCA is the nation's leading trade association for air conditioning, heating and refrigeration contractors with over 1,400 members across the United States and Canada.

MSCA GreenSTAR was created by MSCA to recognize mechanical service contractors who have developed the skills and expertise necessary to deliver energy-efficient, cost-effective indoor environmental solutions to their customers. MSCA has been recognized by the U.S. Green Building Council (USGBC) for its leadership and stewardship of sustainable practices in the HVACR industry.

According to Barbara Dolim, MSCA Executive Director, MSCA GreenSTAR helps MSCA members demonstrate their commitment to enhancing energy efficiency and environmental stewardship. "By attaining MSCA GreenSTAR status, UMC has demonstrated their dedication to environmental issues by becoming their customers' true energy solution partner and promoting sustainability throughout their entire organization. We congratulate UMC as a leader in sustainable service."

"We're very proud of our MSCA GreenSTAR status," said Rich Happel, General Manager, Service Group for UMC. "MSCA GreenSTAR provides our customers with the knowledge and satisfaction that they are working with a company that has been recognized nationally for our expertise and skills in providing energy and cost-saving products and services."

About University Mechanical Contractors, Inc.

University Mechanical Contractors, Inc. (UMC) is one of the largest and most experienced full-service mechanical contractors, and has operated continuously in the Puget Sound region of Washington since 1920. UMC has a great deal of success providing clients with unique mechanical approaches to difficult facility and building construction issues that can positively affect the bottom line. UMC offers a complete range of innovative solutions to protect and enhance the investment of a client's facility by reducing energy and operational costs, improving tenant and employee productivity, promoting a sustainable building environment and being accountable for the ongoing facility systems' performance. UMC's clients include some of the most demanding building environments in hospitals, bio-tech, laboratories, data centers, research centers, industrial waste water and manufacturing facilities.

About MSCA

MSCA is the leading national trade association for HVACR contractors, providing education, marketing and labor/management services to assure its members deliver quality performance, value and expertise for all building system needs. MSCA contractors perform service, maintenance, replacement, retrofit and repair work resulting in enhanced reliability, tenant satisfaction, and efficiency. MSCA has over 1,400 members and is a subsidiary of the Mechanical Contractors Association of America. For more information, go to www.msca.org.
